

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	3866	DATE	29 th July, 2016
MANUFACTURER	UD Trucks Corporation		
DESCRIPTION OF DEFECT	Regarding the vehicles equipped with the front-obstacle-collision-reduction-control-unit ("Traffic Eye Brake"), due to technical limitations of the millimeter wave radar obstacle detection system, when the vehicle drives through a location where the beam of an elevated bridge and the joint of the road are vertically aligned, and while no other vehicles are driving in front of the vehicle, the Traffic Eye Brake system may, in rare occasions, misidentify the millimeter wave inputs as signals from obstacles. As a result, a warning message may appear on the display monitor, the warning alarm may go off, and the brakes may unexpectedly be activated.
