

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic/Import Vehicles

CAMPAIGN No.	gai-2387	DATE	Oct, 31, 2016
MANUFACTURER	DUCATI MOTOR HOLDING SpA (Japanese Importer : DUCATI JAPAN Ltd.)		
DESCRIPTION OF DEFECT	<p>Due to an error in the size of the slots on rear wheel rim hub, it is necessary to check for proper installation of the rear wheel rim on wheel shaft. Indeed, it is possible that the rear wheel rim might have been installed in the wrong way, with the 4 rear wheel shaft driving pins inserted in the slots rather than in the 4 relevant holes. Should this be the case, you might find a noisy rear wheel and under extreme situations, a loss of traction of the vehicle during use.</p> <p>Authorized Ducati dealers will check the rear wheel and the driving pins. If there is damage, replace the rear wheel and the pins. If there is no damage, installing these error-proof inserts will avoid any chance of wrong installation.</p>
