

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN No.	3982	DATE	Feb. 14. 2017
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	<p>On certain light-duty trucks,</p> <p>①when a lever of the manual parking brake is pulled up, although the cause is not identified, the mutual tooth tips of the lever holding structure are uncommonly matched (just the tooth tip and the tooth tip on the other side are balanced) , the lever can't be fixed stably, and after that, the match may come out resulting the lever going down. Therefore, the braking force may decline and in the worst case, the vehicle may start moving.</p> <p>②due to the improper treatment of the instrument panel brace edge, the wire harness routing around may interfere. Therefore, the coating may be damaged by the vibration while driving, the wire harness and the brace may short-circuit. In the worst case, there is a possibility that the functions of equipment such as wipers etc. stop operating, the engine stops while driving and cannot start again.</p> <p>③due to insufficient strength of the fuel filter case for the diesel engine, there are some cracks are generated into the case of the fuel filter by changes of the fuel pressure and the engine vibration, resulting the fuel to leak.</p>
