

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	3994	DATE	Feb.15.2017
MANUFACTURER	TOYOTA		
DESCRIPTION OF DEFECT	<p>In the Fuel Cell (FC) system of the subject vehicle, due to improper boost control programming in the FC Converter, there is a possibility that output voltage generated by the FC converter could exceed the maximum control voltage when driving on a long descent. In this condition, a warning light will illuminate and the FC system will be suspended, resulting in loss of motive power.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
ZBD-JPD10	[MIRAI]	2014-2016	1,455
		TOTAL	1,455
