

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-2521	DATE	2017/7/27
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain A-/B-Class (176/246 platform) and CLA (117 platform) vehicles with gasoline engine M270 (LHD/RHD), the supplied connection piece of the vacuum line to the brake booster might break. Should the connection piece break, the brake booster would not be supplied with vacuum any longer. As a result the brake force support would decrease gradually and the brake pedal would need to be applied with higher force after a few brake actions.
