

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	4113	DATE	Sep. 27. 2017
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain automatic transmissions of medium duty trucks, due to the insufficient hardness of the output flange end surface, the flange end surface may wear out by the engine resonance while driving, causing the flange clamping bolt to be loosen. Therefore, an abnormal noise may be made and oil may be leaked from the transmission, and in the worst case, there is a possibility that the bolt may break and the propeller shaft may come off the vehicle, resulting the vehicle unable to move.
