

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-2554	DATE	2017/10/19
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain C-Class vehicles (AMG/205 platform) with 8-cylinder gasoline-engine, the software of the engine control unit may not meet the specifications regarding misfire detection. As a consequence misfires could be incorrectly detected, thereby leading to a check engine light (MIL) activation in circumstances where no misfire occurred (i.e. false MIL). Should the MIL be activated by a falsely detected misfire, the lambda regulation might be deactivated and emission limits might be exceeded.
