

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	4 1 6 4	DATE	Dec.14.2017
MANUFACTURER	N I S S A N		
DESCRIPTION OF DEFECT	<p>In the circuit board of the power supply distributor, there are some boards that moisture-proof material was coated with unnecessary solder attached to the board at the time of the production of the circuit board, and in a use process, some cracks may occur in the coating. Therefore, under high humidity environment, the minute conduction will be generated and an electrode ingredient moves, and if a short circuit is formed, in an extreme case, it may lead to a vehicle fire by the fever of the short circuit electric current.</p>
