

# Opinions on the Work Plan of AWaP

*Indonesia*

1

## Comments on Workplan Objective 1. Raising Awareness on Wastewater Management

Indonesia has legalized regulation related to Minimum Services Standard (Government Regulation No.2/2018), including wastewater services, and technical regulation about Wastewater Management (Minister of PWH Regulation No.4/2017). However, law enforcement strategy is still needed to increase awareness of local government and general public.

## Comments on Workplan

### Objective 2. Monitoring of Wastewater Management

- ❓ Strategy to separate wastewater institution into regulator and operator. The regulator responsible for monitoring while operator responsible for operating the whole system of wastewater to ensure the system works well and effluent complies with regulation.

## Comments on Workplan

### Objective 3. Resolving Common Challenges

- ❓ Method to determine the appropriate technology to be implemented in Indonesia, considering several aspects such as financial-economic feasibility, environment feasibility, and specific condition in Indonesia.
- ❓ The technology option must be easy to operate, complies the effluent regulation, and local government can afford the operational cost.

**Thank You**
