

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	4525	DATE	Jul.11 2019
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	In the relevant large-sized buses, since the fixing method of the wiring for the optionally provided front door glass heater is inappropriate, the wiring at the arm (upper horizontal bar) may be locally bent when the door is opened and closed. Continued use of the vehicle may cause repeated bending of the wiring when the door is opened and closed, resulting in an open circuit in the wiring and occurrence of smoke.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
