

VEHICLE SAFETY RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	4789	DATE	Aug. 4 , 2020
MANUFACTURER	SUZUKI MOTOR CORPORATION		
DESCRIPTION OF DEFECT	<p>Due to the improper work instruction at the assembling process, the protection cover under the vehicle floor for the harness connected to the auxiliary power module (lithium-ion battery) was not installed in some of the vehicles.</p> <p>Therefore, the harness could be damaged/cut by stone impact during driving and the lead-acid battery and the lithium-ion battery may not be charged.</p> <p>If the vehicle is being used continuously in such condition, the lead-acid battery may run out and the engine may stall or fail to start in the worst case.</p>
