

## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-3077	DATE	2020/8/27
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd. )		
DESCRIPTION OF DEFECT	On certain GT and G-Class vehicles (190 and 463 platforms) the engine control unit software might not meet the specifications. In case of the engine being shut down for more than 67 hours, the catalyst heating induced by an increase of the idling speed might not be initiated with the next engine start as intended.  As a result the heating of the catalytic converter would take longer than intended. In consequence legal requirements regarding emission limit values might not be met.
