

## VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Import Vehicles

CAMPAIGN No.	GAI-3080	Date	August 27, 2020
MANUFACTURER	Volkswagen (Japanese Importer: Volkswagen Group Japan KK)		
DESCRIPTION OF DEFECT	<p>In the fuel injection system, there is a fuel injection system manufactured according to a standard that is out of the threshold value of inspection determination because the manufacturing control of the fuel injector is inadequate. As a result, after the engine is switched off for an extended period, small fuel quantities can get into the combustion chamber and lead to legal emission values not being robustly ensured in the following driving cycle.</p>
