

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN No.	4803	DATE	6-October-2020
MANUFACTURE	Hitachi Construction Machinery Co.,Ltd.		
DESCRIPTION OF DEFECT	Due to the wrong selection of the permanent magnets installed in a fuel pump on wheeled machines, de-magnetization may occur when the temperature is low. In this situation, the high-rotation and high current, which may lead to excess abrasion of brushes of a motor, occurs, and a contact failure and a malfunction of a fuel pump shall occur. In the worst case, the engine can stop during travelling, and restarting the machine may become not possible.
