

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	4881	DATE	Jan. 28. 2021
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain bus door anti-trap detectors (photoelectric devices), they may detect that there is an obstacle even though there is no obstacle because of incomplete examination of external factors such as water droplets adhering to the phototube and ambient light. Therefore, the anti-trap system may be activated, causing the automatic door for getting on and off not to be opened and closed.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
