

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Import Vehicles

CAMPAIGN No.	GAI-3297	DATE	14, Oct, 2021
MANUFACTURER	Automobili Lamborghini SpA (Japanese Importer: Audi Japan KK)		
DESCRIPTION OF DEFECT	In certain seat belt assemblies, the automatic locking retractor (ALR) function may deactivate early before the webbing is fully retracted. The potential safety defect may occurs only using child restraint seats for which the vehicle owner elects to use the seat belt to secure the child restraint seat instead of the LATCH system. Even though this function is not a mandatory requirement, in a proactive manner and out of an abundance of caution, Lamborghini decided to launch a safety recall on all markets that received the involved components.
