

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN NO.	5031	DATE	October 28 ,2021
MANUFACTURER	ISUZU MOTORS LIMITED		
DESCRIPTION OF DEFECT	<p>In certain engines of heavy-duty trucks, if there is a micropore in the portion where stress is highest at the time of second resonance in the turbine impeller of the turbocharger, the turbine impeller is damaged by a fatigue breakdown triggered by the micropore, and subsequently things such as abnormal noise, white smoke discharge, and insufficient output may occur, possibly leading to the engine check light to be turned on. Therefore, if the turbocharger is used continuously without repair, abnormal vibration may happen in the turbocharger, the turbocharger's oil feed pipe may crack because of fatigue, and then oil may leak and adhere to high temperature portions, eventually resulting in a fire.</p>
