

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	5042	DATE	Nov. 1 2021
MUNUFACTURER	Mitsubishi Fuso Truck and Bus Corporation		
DESCRIPTION OF DEFECT	<p>On some heavy-duty trucks, the Advanced Signal and Actuation Module (ASAM) control program is inappropriate. Accordingly,</p> <p>① On some heavy-duty trucks equipped with an automatic transmission, the engine may stop suddenly, and if the lighting switch is used in the auto position, problems such as turning off the headlights may occur.</p> <p>In addition, for vehicles with a harness added to the ASAM, an alternator warning may be displayed when the engine is started.</p> <p>② The blinking speed when the Emergency Stop Signal (ESS) is activated will be less than as specified by the safety standards. In a tractor, it will not be possible to check the operating status of the turn signals in the driver's seat, because the blinking speed of the direction indicator on the meter cluster will not change even if any of the turn signal lamp bulbs on the trailer blows out.</p>		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
2KG-FV70GX	「FUSO SUPER GREAT」	2020~2021	113
