

## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-3326	DATE	2021/12/2
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd. )		
DESCRIPTION OF DEFECT	On certain S-Class vehicles (223 platform) with Diesel engine, the fuel level might not be displayed correctly. Due to contact with an internal fuel line in the fuel tank, the movement of the fuel fill level sensor might be impaired. As a consequence, the fuel display might indicate a higher fuel level than what is actually remaining in the tank. In this situation, the vehicle might run out of fuel without the driver being aware of it and subsequently the engine might stall during driving. This would increase the risk of a crash.
