| CAMPAIGN No. | 外-3342 | DATE | 21 st , Jan, 2022 |
| MANUFACTURE | Tesla, Inc. (Japanese Importer; Tesla Motors Japan) | | |
| DESCRIPTION OF DEFECT | <p>The secondary frunk (Front trunk) latch actuates into position at the back of the frunk striker. On some Model S vehicles, the latch assembly may be aligned too far rearward. While this alignment does not impact latching of the primary latch with the frunk striker, it may prevent latching of the secondary latch.</p> <p>If the primary latch is inadvertently released and the secondary latch is not engaged, the frunk may open without warning and obstruct the driver's visibility, increasing the risk of a crash.</p> | | |
