

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-3211	DATE	2021/4/22
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	<p>On certain A-Class (177 platform), GLA (247 platform) and CLA (118 platform) vehicles with 4-cylinder gasoline engine, the variant of the spark plugs might not meet specifications. In this case, the combustion might be impaired and an exceedance of CO2-emissions and exhaust gas emissions cannot be excluded.</p> <p>Over a longer period of operating time, an increased mechanical wear of the spark plug due to thermal overload could not be ruled out. As a result, parts of the spark plug might detach in the combustion chamber, potentially leading to an engine damage. In this case, a stalling of the vehicle cannot be ruled out. This would increase the risk of an accident.</p>
