| MANUFACTURE           | Mercedes-Benz AG<br>(Japanese Importer : Mercedes-Benz Japan Co., Ltd. )   |      |           |
| DESCRIPTION OF DEFECT | <p>On certain GLE and GLS (167 platform) vehicles the bolting of the 48V ground connection under the passenger seat might be fastened with an insufficient torque.</p> <p>In this case, the cable lug of the ground line might not be fixed correctly. Subsequently, the electric resistance of the connection might increase. In combination with the high electrical currents potentially flowing through this connection, the temperature in this area might rise. As a consequence, a risk of fire cannot be ruled out completely.</p> |      |           |
