

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN No.	Gai-3470	DATE	2022/9/14
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	<p>On certain E-Class (213 platform), E-Class Coupe/Cabriolet (238 platform), CLS (257 platform) and AMG GT 4-door (290 platform) 4-wheel-drive the transmission wiring harness might not be routed according to specifications.</p> <p>In this case, the mechanical load on the single-wire seal of the transmission wiring harness could lead to a separation in the seal of the electrical connector. As a result, water from the roadway or environment could penetrate the connector. The presence of water could herby create a creeping short circuit if the vehicle is parked. As a result, the short circuit could lead to thermal overload for a longer period of time. Subsequently, the risk of fire cannot be ruled out.</p>
