|-----------------------|--|------|-----------------|
| CAMPAIGN No.          | Gai-3475   | DATE | October 7, 2022 |
| MANUFACTURE           | General Motors Company<br>(Japanese Importer : General Motors Japan Ltd. )   |      |                 |
| DESCRIPTION OF DEFECT | General Motors has decided that certain 2022 model year Cadillac Escalade, Escalade ESV, Chevrolet Corvette, Suburban, and Tahoe vehicles fail to conform to Economic Commission for Europe (ECE) R48, Annex 13, Automatic Switching Conditions – Dipped-Beam Headlamps for certain countries. Due to chip substitution requirements, ambient light sensors were built with a chip from a new supplier. Under daytime conditions, sensors built with the new chip may provide a lower saturation voltage than sensors built with the original chip and result in the BCM (body control module) setting “unknown” for the day/night status and DTC B108E - Ambient Light Sensor Signal. |      |                 |

| TYPE       | COMMERCIAL NAME | MODEL YEAR RECALLED | NUMBER OF VEHICLE |
|------------|-----------------|---------------------|-------------------|
| 「7BA-A2LL」 | 「ESCALADE」      | 2022                | 47                |
| 「7BA-A2LL」 | 「CORVETTE」      | 2022                | 81                |
|            |                 | TOTAL               | 128               |
