

## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN No.	Gai-3500	DATE	2022/11/1
MANUFACTURE	Daimler AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd. )		
DESCRIPTION OF DEFECT	On AMG GT (190 platform) vehicles the bonding of the carbon-fiber driveshaft and the engine-/transmission flange might not meet specifications. The adhesion of the bonding might be impaired due to the presence of residue remaining from the production process on the bonding surfaces between the carbon-fiber driveshaft and the flange. In such case, the connection between the carbon-fiber driveshaft and the flange might detach during vehicle operation, resulting in the impairment of the transmission and the potential for a loss of traction between the engine and the transmission. This could result in a loss of motive power in isolated cases, increasing the risk of a crash.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
