

## VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-3532	DATE	2022/12/13
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd. )		
DESCRIPTION OF DEFECT	<p>On certain E-Class (213 platform) and CLS (257 platform) vehicles with 48V-system, the mounting of the 12V battery in the trunk might not withstand the loads in the event of a crash.</p> <p>In this case, the 12V battery could move in the spare wheel well. Thus, a detachment of the electrical connections from the battery cannot be ruled out. In that event, various post-crash functions (e.g. eCall, electric seat adjustment, hazard warning lights, automatic door unlocking) could be impaired or inoperative. This might increase the consequences of a crash for the vehicle occupants.</p> <p>Furthermore, local legal requirements might not be met.</p>
