

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

CAMPAIGN No.	Gai-3534	DATE	2022/12/13
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	On certain C-Class (206 platform) vehicles with diesel engine, the adhesive force of the fuel supply line might not meet specifications. In this case, the fuel supply line could slip off the connection nozzle despite a correctly closed clamp. As a result, fuel could leak and the pressure in the fuel supply line could drop. This could lead to misfires up to an unannounced shutdown of the engine while driving. In addition, a risk for the subsequent traffic cannot be ruled out by the leaked fuel. Furthermore, legal requirements might not be met.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
3CA-206004C	C220d	2022	2,393
3CA-206204C	C220d Wagon		478
3CA-206214C	C220d 4MATIC All-Terrain		638
