

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic ~~Import Vehicles~~

CAMPAIGN No.	Gai-3680	DATE	2023/9/28
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan Co., Ltd.)		
DESCRIPTION OF DEFECT	<p>On certain C-Class (206 platform), E-Class (213 platform) vehicles, the software of the engine control unit might not meet specifications.</p> <p>In this case, depending on the intensity and duration of solar radiation on the hood of a parked vehicle, the on-board-diagnosis might erroneously detect a failure of a temperature sensor, even though there is no defect present.</p> <p>As a result, the malfunction indicator light would be illuminated and - depending on which temperature sensor is affected - the limp home mode would be activated without justification. As a result, local legal requirements regarding OBD monitoring and exhaust emissions might not be met.</p>
