

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Import Vehicles

Campaign No.	Gai-3817	Date	June 28, 2024
Manufacturer	Liuzhou Wuling Automobile Industry Co., Ltd. (Japanese Importer: ASF Inc.)		
Description of defect	A brake hose fitted between the brake fluid reservoir tank and the brake master cylinder are subject to chemical reactions with the brake fluid in the brake hose concerned due to inappropriate material selection. Furthermore, the brake fluid eluted by the chemical reaction may cause a chemical reaction with the cups in the brake master cylinder, resulting in deterioration of the cups. As a result, if you press on the brakes continuously at low speeds, the fluid pressure in the brake master cylinder may decrease and braking power may be reduced.
