

# VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic~~Import~~ Vehicles

CAMPAIGN No.	Gai-3865	DATE	30 <sup>th</sup> Oct, 2024
MANUFACTURER	BMW (Japanese Importer: BMW Group Japan Corp.)		
DESCRIPTION OF DEFECT	On affected diesel vehicles, EGR (Exhaust-Gas-Recirculation) cooler could become leaky over time due to insufficient durability. The glycol-leakage in combination with typical soot deposits and the high temperatures normally present in the EGR module, might result in smoldering particles. This could lead in very rare cases to the melting of the intake manifold and in extremely rare cases result in a possible fire.
