

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	外-4053	DATE	August 1. 2025
MANUFACTURER	JOHN DEERE (Japanese importer:YANMAR AGRIBUSINESS CO.,LTD.)		
DESCRIPTION OF DEFECT	Due to an improper manufacturing process, some of the fastening bolts for the four-wheel drive shafts of agricultural tractors have insufficient tightening torque. As a result, if continued use is continued in this condition, the fastening bolts will loosen, and in the worst case scenario, the fastening bolts may fall off, causing the four-wheel drive shaft to become dislodged and interfere with the shaft cover, resulting in abnormal noise.
