

# VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic~~Import~~ Vehicles

CAMPAIGN No.	Gai-4094	DATE	Oct 22 <sup>th</sup> , 2025
MANUFACTURER	BMW (Japanese Importer: BMW Group Japan Corp.)		
DESCRIPTION OF DEFECT	On affected vehicles specific cell modules of the HV-battery may not have been produced according to specification. During the production process the affected modules were constructed with a double cathode layer or a misalignment of the layers. In case of a double layer cathode sheet and a misalignment, the lithium is plated or accumulated at the edge of the anode sheet. As a result, lithium dendrites could electrically connect the cathode and the anode or the anode tab without any separator damage and this may result in a short circuit between cathode and anode. In the worst case this short circuit may lead to a thermal propagation of the module resulting in a vehicle fire.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
ZAA-82GC32	「MINI Aceman SE」	2024	1
ZAA-32GC32	「MINI Aceman E」	2024	1
