

VEHICLE SAFETY / POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-4090	DATE	2025/10/16
MANUFACTURE	Mercedes-Benz AG (Japanese Importer : Mercedes-Benz Japan G.K.)		
DESCRIPTION OF DEFECT	On certain EQC (293 platform) vehicles the corrosion protection of the high-voltage battery housing in the area of the connections may not be ensured over lifetime. Subsequently, corrosion of the housing of the high-voltage battery may occur after a longer operating time, depending on certain environmental influences. In this case the sealing effect of the battery housing could gradually be reduced over time, potentially allowing a moisture ingress into the battery. This could result in an insulation fault that would prevent a restart after the vehicle has been parked. Furthermore, a risk of fire cannot be completely ruled out under such conditions.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
