

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.		Gai-4225	DATE	August 13, 2026	
MANUFACTURER		JOHN DEERE (Japanese importer: YANMAR AGRIBUSINESS CO., LTD.)			
DESCRIPTION OF DEFECT		In the steering system of the agricultural tractor, inadequate review during a design modification of the transmission harness resulted in the omission of the wheel speed input wiring. Consequently, when the variable steering function is enabled and the vehicle speed exceeds 10 km/h, the system may erroneously recognize a malfunction and deactivate the variable steering function, which could increase the turning radius of the vehicle.
