

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	Gai-4226	DATE	August 13. 2026	
MANUFACTURER	JOHN DEERE (Japanese importer: YANMAR AGRIBUSINESS CO., LTD.)			
DESCRIPTION OF DEFECT	In the power transmission system of the agricultural tractor, due to an improper manufacturing process, some units were assembled with the planetary gear retaining bolts inside the rear final drive tightened without the application of thread-locking adhesive. As a result, continued operation in this condition may cause the bolts to loosen, leading to misalignment of the gear mesh. In the worst case, the gears may be damaged, resulting in a loss of drive and the tractor becoming immobile.
