

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	5266	DATE	January 19, 2023
MANUFACTURER	DAIHATSU		
DESCRIPTION OF DEFECT	<p>In the electric parking brake system, there are cases where the return amount of the brake cable is insufficient when the brake is released because of the improper computer program. Therefore, if using the parking brake repeatedly, the brake cable will eventually deviate from its operation range. And then, the warning lamp is turned on when the abnormality is detected . In the worst case, there is a possibility that the parking brake cannot be released.</p>
