

VEHICLE SAFETY/POLLUTION RECALL CAMPAING IN JAPAN

Domestic / vehicles

CAMPAIGN No.	5399	DATE	Oct.25.2023
MANUFACTURER	Hino Engineering Annex Co., Ltd		
DESCRIPTION OF DEFECT	<p>For large trucks with modified trunnion suspension to lower the floor, Due to inappropriate instructions for processing the trunnion spacer, a gap may occur between the trunnion seat and trunnion spacer during assembly</p> <p>Therefore, as the trunnion spacer wears down due to running vibration, the gap decreases, the axial force of the U-bolt that fixes the leaf spring decreases, the shock absorber may not function properly.</p>
