

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	5550	DATE	October. 3. 2024
MANUFACTURER	HONDA MOTOR CO., LTD.		
DESCRIPTION OF DEFECT	Some high-voltage batteries for hybrid vehicles are having their swaged external materials glued together immersed in the electrolyte in the battery cell due to inappropriate management of the battery cell terminal in the battery. If a battery under this condition continues to be used, the terminal will be eroded by the electrolyte and fracture, activating the power system warning light and the fail-safe system, which has risk of stopping the hybrid system to make the vehicle undrivable eventually.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED		NUMBER OF VEHICLE
6AA-FL4	「CIVIC」	2022～2023		51
6AA-RZ4	「ZR-V」	2022		3
