

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

CAMPAIGN No.	5592	DATE	December 5, 2024
MANUFACTURER	DAIHATSU		
DESCRIPTION OF DEFECT	In the front suspension, the paint adhesion to the steel of the coil spring is inadequate. As a result, if sand or small stones get caught in the spring, the paint layer can easily peel off, accelerating corrosion. Continuing to use it in this condition may lead the coil spring to break, which could potentially result in a tire puncture and make the vehicle unable to drive.		

TYPE	COMMERCIAL NAME	MODEL YEAR RECALLED	NUMBER OF VEHICLE
