

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic / Import Vehicles

CAMPAIGN No.	5618	DATE	11-Mar-25
MANUFACTURER	KYOKUTO KAIHATSU KOGYO CO., LTD. Kyokuto Group Head Office Building, 2-5-11, Awajimachi, Chuo-ku, Osaka, Japan		
DESCRIPTION OF DEFECT	In a device designed to prevent the lifting of the dump arm during the container loading and unloading operation of a vehicle equipped with a detachable device, there are some instances where the gap between the stopper and the lock pin is insufficient due to a lack of design verification, manufacturing management, and inspection process confirmation. As a result, if the device is damaged during the dumping operation and continues to be used in that state, there is a risk that the part may fall off while driving, potentially obstructing traffic.
