

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic Vehicles

| | | | |
|-----------------------|---|------|-----------------|
| CAMPAIGN No. | 5745 | DATE | January 13,2026 |
| MUNUFACTURER | HOWA MACHINERY,LTD. | | |
| DESCRIPTION OF DEFECT | <p>In the hydraulic circuit of the cleaning vehicle's working equipment, the check valve is poorly selected, and heat from the engine can cause the pressure in the piping to rise. As a result, the pressure prevents the working equipment's check valve from opening, and the cleaning equipment (left and right brushes) cannot be retracted after the equipment is stopped, which could interfere with other traffic. Furthermore, repeated exposure to high pressure on the hydraulic hoses can cause damage.</p> | | |

| TYPE | COMMERCIAL NAME | MODEL YEAR RECALLED | NUMBER OF VEHICLE |
|-------------|-----------------|---------------------|-------------------|
