

VEHICLE SAFETY/POLLUTION RECALL CAMPAIGN IN JAPAN

Domestic

/ Import Vehicles

CAMPAIGN No.	5842	DATE	Jul. 1. 2026
MANUFACTURER	Hino Motors, Ltd.		
DESCRIPTION OF DEFECT	On certain computers for the electronically controlled brake system, due to inappropriate settings in the control program, the system may incorrectly learn the vehicle weight as being lighter than the actual vehicle weight during use. Therefore, if there is a significant discrepancy between the actual vehicle weight and the learned value, the electronic stability control system may fail to activate or its activation may be delayed, possibly causing a vehicle rollover.
