| MANUFACTURER          | KYOKUTO KAIHATSU KOGYO CO.,LTD.                                                                                                                                                                                                                                                                                                                                                                                                                                                          |      |           |
| DESCRIPTION OF DEFECT | For certain single-vehicle transport trailers, due to inappropriate work instructions during manufacturing, the rear combination lamps were incorrectly installed with the left and right sides and the top and bottom reversed. As a result, water drainage may not function properly, leading to a short circuit that interrupts the electrical supply and causes the affected lamps to fail to illuminate. Consequently, the vehicle may not comply with applicable safety standards. |      |           |
