

For new vehicles, a new inspection was introduced

Detects malfunctions in vehicle electronics

OBD Inspection Portal

In October 2024, electronic technical inspection (OBD inspection) was added to vehicle inspections.

OBD inspection is required by law

OBD inspections and repairs are subject to a charge

Have your OBD inspections/OBD confirmations conducted at inspection stations or designated/certified maintenance shops

◀ Vehicles that are subject to OBD inspection are indicated on the inspection certificate.

Coverage

New models of passenger cars, buses and trucks type-approved after October 2021

* Oct. 2022 for imported vehicles

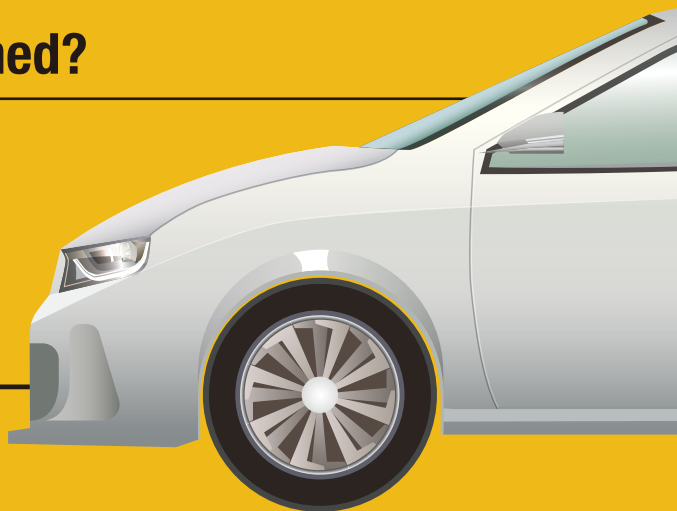

Ministry of Land, Infrastructure, Transport and Tourism

OBD Inspection Frequently Asked Question

✓ How is an OBD inspection performed?

A scan tool is connected to the vehicle's computers (OBD) to check for electronic malfunctions.

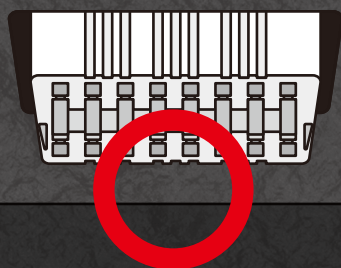

✓ If any electronic malfunction are found, will the car not pass inspection?

If you don't fix it, your car won't pass inspection.

✓ Is there any cost for OBD inspection or repair of malfunctions?

OBD inspections and repairs are subject to a charge. Please check the fee with your maintenance shop.

*The connector is located on the lower right or left of the driver's seat

CHECK status of the CONNECTOR

If there are any devices plugged into the data link connector, the vehicle cannot be inspected, please remove them before inspection.
