

Advanced Air Mobility Roadmap

Public-Private Committee for Advanced Air Mobility
dated March 18, 2022

This roadmap outlines a flow of technology development and establishment of regulations which should be conducted with public-private cooperation. The roadmap focuses on possibility that challenges in urban and rural areas will be resolved with realization of more familiar and convenient means of air mobility, “Advanced Air Mobility (AAM)” – electric-powered vertical take-off and landing, and pilotless aircraft.
