# Fostering integrated coresponsibility in a regional urban agenda.

Dept. of Territory and Sustainability  
GOVERNMENT OF CATALONIA

In 2050, Catalonia is set to produce its **100% of primary energy** from renewable sources...

...how will adapt the building stock to **fit self-production?** How will prepare cities to cope with the **electric mobility energy demand?**

01

HEALTH

In 2051, the **dependent population rate** in Catalonia will have **doubled** and will represent the **55,9% of the total population...**

...how have to adapt the public venues and spaces to cope with **an increasingly aging population?**

02

WELLBEING

Only **9 out of 28 municipalities** over 50.000 inhabitants equal or surpass the **green zone per inhabitant** as recommended by the WHO.

In BCN, between 50% and 70% of street space is devoted to **motorized vehicles traffic and parking**.

...how can we provide our urban habitats with more **high quality pollution free spaces?**

03

URBAN QUALITY

In Catalonia up to 40 million **online purchases** are made each year, which supposes a **20% increase in light freight movements**, only in BCN. Online retail is experiencing 21,5% annual growth rates.

...how must our cities and buildings prepare to absorb and manage higher **e-commerce** flows?

04

PROSPERITY

In 2100, **sea level will rise** between 90 cm i 1,80 m. Shoreline erosion in Catalonia is, by average, 90 cm per annum. How can we intervene in our shores to mitigate **shoreline regression**?

In the coming years, predicted deaths due **to rising temperatures** escalates from 300 persons per year up to 2.500 persons per year.

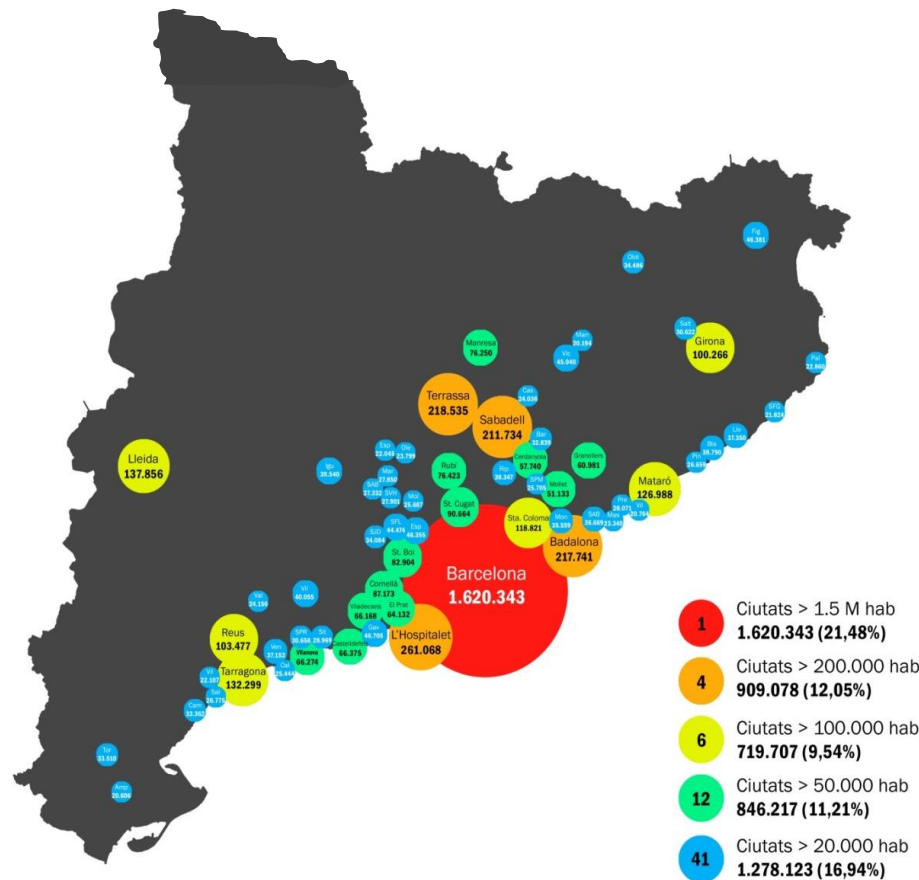

What kind of actions do cities need to take in order to effectively mitigate **the heat island effect**?

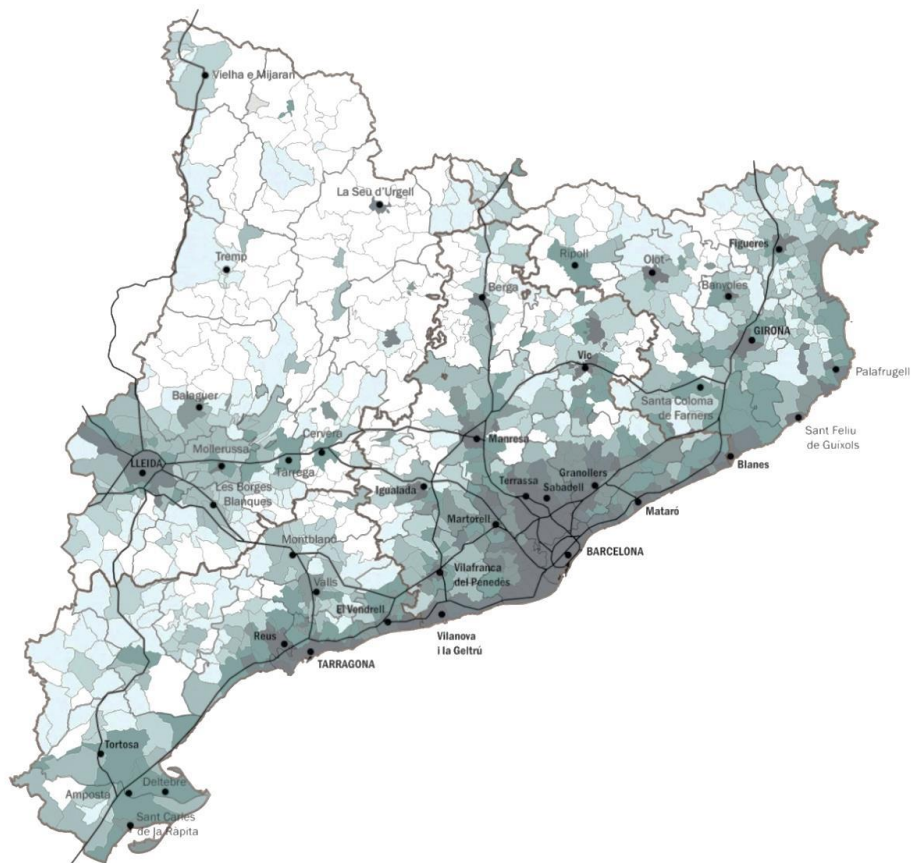

9 out of 10 persons in Catalonia live in urban areas...

... How can we make public policies to take into account both **urban and territorial dimensions**?
