Manda-no-tsutsumi (Manda Levee)

Source: Yodogawa(Yodo River) Work Office, Ministry of Construction

Description:

Manda-no-tsutsumi (Manda Levee) is said to be the first flood control project on record in Japan, built by the order of Emperor Nintoku in the 4th century. A narrow path along an old river in a residential area is said to be the site of levee, and a monument has been erected there.
