

Fun for the whole family, this snow park is a place where three generations (or more) can relax together. Make lifelong memories playing with your young children as they enjoy frolicking in the snow.

A kid-friendly area offering sledding, skiing, and play equipment, the Kids' Park is a popular option for families with young children. A kids-only nursery slope gives youngsters a chance to safely learn the ropes—without the need for Mom and Dad to worry. Complimentary sledding equipment provides hours of fun for the whole family. To save precious energy best devoted to romping in the snow, the park has a moving sidewalk, allowing kids and partners-in-play to sail down the slope time and time again without having to tow sleds back up the hill.

A bouncy castle and other play equipment add to the excitement, and a covered rest area provides a spot to warm up and take a quick break.
