

Ise-Shima National Park Skywalk (Shima Area)

The picturesque scenery of Ago Bay can be enjoyed from Yokoyama View Point.

The bay is characterized by an intricate, indented ria coastline with around sixty small islands that seem to float on the calm waters.

Let's take an aerial tour of a selection of Ise-Shima National Park's most remarkable spots.

This is Kashikojima- famous for pearl cultivation and the site of the 2016 G7 summit.

Brilliant white sands and shallow waters characterize Gozashirahama Swimming beach- where visitors can enjoy swimming while surrounded by beautiful nature.

Situated on a rocky promontory, Daiozaki Lighthouse watches over the sea and Daio Town.

Climbing to the top of the lighthouse for views of the ocean and fishing villages dotted along the coast.

Daio town's intricate alleyways and dramatic coast attract and inspire many artists.

It is also a popular place to see the first sunrise of the new year.

Tomoyama Park has some great outdoor activities, such as sea kayaking, hiking and nature tours.

So, what did you think about the Ise-Shima Skywalk?

This is only a fraction of what Ise-Shima National Park has to offer.

You must, of course, see these beautiful landscapes with your own eyes!
