

Toba View Point

Located along the Pearl Road that stretches 23.8km between Shima and Toba, the Toba View Point is a scenic spot. One can view both the Pacific and forests of Ise Jingu, Japan's most important *jinja* (Shinto shrine) complex, from here. The panoramic ocean vista stretches from the Atsumi Peninsula to Daiozaki. There is also a souvenir shop and a restaurant serving local seafood.

As the stars are clearly visible, people also visit this area to view the night sky.
